Circular No.: NSDL/POLICY/2009/0062 Date: July 21, 2009

Sub: Daily Backups of database for NSDL DPM system

As all Participants are aware, it is important to take backups of the DPM system on a daily basis. Taking regular backups as per the stipulated procedure will help Participants recover the database in a situation of crisis, which otherwise could severely jeopardize business recovery plan and recreation of the database of the DPM system. In the event of DPM system crash, NSDL may assist the Participant in recreating the database to the extent feasible. In case the previous day's proper backup is available, then recreation of the DPM system would be done without any charge. However, if the proper backup is more than a day old, then the Participant will be charged Rs. 10,000 plus Rs. 2,000 per man hour of NSDL time spent in recreating the database.
